PROFESSIONAL PROFILE Computer Engineering student interested in learning new technologies and exploring different fields in tech. I enjoy building projects, experimenting with tools, and improving my problem solving skills through practical work. Always open to learning and gaining new experiences.

PROJECT EXPERIENCE

Thesis Management System using Django

Developed a role-based thesis management web application using Django. Implemented thesis group management, proposal submission/review, and progress tracking. Built notification and defense scheduling features for smooth workflow coordination. Designed secure authentication and approval workflows for different user roles. Created dynamic dashboards for students, lecturers, and supervisors.

Pet Adoption Platform – Group Project | React, Django REST Framework

Developed a full-stack pet adoption platform with user authentication and filtering. Used DRF for backend APIs and React for dynamic UI.

Pharmacy Management System – C++ Console App

Built billing and inventory management system using object-oriented programming principles. Utilized file handling for data storage and access.

EDUCATION

B.E. in Computer Engineering Acme Engineering College, Basundhara, Kathmandu, Nepal.	2022–Present
--	---------------------

Higher Secondary (+2) Everest Innovative College, Solteemode, Kathmandu, Nepal.	2018–2020
---	------------------

Secondary Education Examination (SEE) Learning Realm International School, Kathmandu, Nepal	2018
---	-------------

PROFESSIONAL DEVELOPMENT

Work Experience

Django Developer intern
Code Fusion, New Banaeshowr

Leadership and Involvement

President, ACIT Club - Plan, manage technical and non-technical events at college, lead event logistics, team coordination

Skills

- **Languages:** Python (basic), C, C++
- **Web:** HTML, CSS, Django REST Framework (Basic)
- **Tools:** GitHub, VS Code, MySQL
